Components

Axiom Rail Components offers a wide range of components to support the activities of its customer base. We are able to provide wheel sizes from 500mm dia to 1400mm dia compliant with European Standards such as EN13261 and meet all TSI requirements. With access to an annual capacity of up to 1,000,000 wheels, Axiom Rail is able to achieve very stringent delivery requirements.

We are able to offer fully assembled wheelsets covering a wide range of applications. All components are manufactured in accordance with the latest specifications and where applicable meet country specific requirements. Our manufacturers utilise the most advanced wheel and axle production techniques benefiting from computer controlled systems to manage all aspects of the production and manufacturing processes.

In support of the growing numbers of Axiom Rail suspension systems now in traffic, we are able to offer a fully flexible repair, overhaul and maintenance service as well as the supply of individual new components.

Monobloc Wheels

- 1,000,000 production capacity
- 500mm dia to 1400mm dia
- TSI Approval
- DB HPQ Approval

Wheelsets

- Compliant to EN13260
- TSI Approved
- Bearing and axlebox fitting available

Freight Spares

- LN25, AMIII and LN25sa single axle
- Drawgear components
- Brake components
